### Product Information:

#### Recommended use

- perfect for quick shut-off or quick drainage of spilled chemical products before they enter ventilation grilles, manholes and pipes

#### Application

- before application clean the ground – it should be free from dirt and detritus.
- be sure that Drain Cover Mat is wider than the area that has to be blocked (in case of circle barrier)
- put the sticky side on the ground and fix it using pressure
- ground has to be dry

#### After application

- after use it is easy to clean, for example with soap and water

#### Storage

- store the mat in the supplied box until the next use
- the glue surface must be inside the box to prevent dust accumulation

#### Properties

- chemically resistant
- equipped with two handles on both sides for noticeably easier use
- Sulphuric acid: Drain Cover Mat shrinks slightly, phenol 50 °C:
- drainage mat swells slightly (3-day test)
